🌐 Dan Jose

PROFILE

AI/ML-focused engineering student with hands-on experience in machine learning, system-level AI development, and intelligent automation. Developed projects including a voice-controlled AI assistant (JARVIS), facial emotion detection using machine learning, and predictive models for healthcare applications. Passionate about building practical AI systems and seeking an AI/ML internship to apply problem-solving and system design skills.

PROJECTS

JARVIS – System-Level AI Assistant

- AI assistant capable of controlling computer operations through voice commands
- Integrated speech recognition and local LLMs using Ollama
- Internet-enabled assistant for real-time information retrieval
- Automated responses for emails and WhatsApp messages

Facial Emotion Detection using Machine Learning

- ML model to predict facial expressions and classify emotions
- Designed for real-time emotion detection
- Future integration with JARVIS for emotion-aware interaction

DCD Detection using Machine Learning

- ML model for early detection of Developmental Coordination Disorder
- Applied data preprocessing and feature engineering
- Project pre-incubated at Christ University Incubation Centre

Energy Generation from Gym Equipment

- Prototype system converting mechanical gym motion into electrical energy
- Focus on sustainable power generation
- Patent process currently in progress

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning

CHRIST (Deemed to be University), Bangalore
2024 – 2028

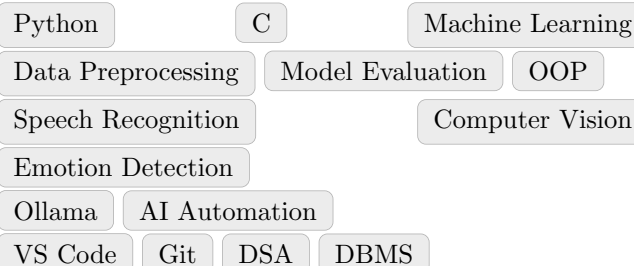

Senior Secondary Education (State Board)

St. Joseph's , Peravoor
2022 – 2024

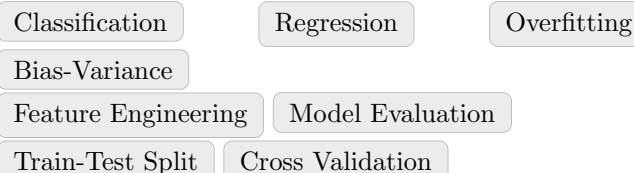

Primary Education (CBSE)

Navajyothi English Medium School, Edathotty
2008 – 2022

TECHNICAL SKILLS

CORE ML CONCEPTS

STRENGTHS

- Research-oriented mindset
- Strong system-level thinking
- Comfortable with AI pipelines
- Interests: LLMs, System Design
